

Shade Systems

COVERED OUTDOOR LEARNING AREAS (C.O.L.A.s)

C.O.L.A.s maximize the use of outdoor space, providing year round protection from the sun and rain, allowing uninterrupted programs.

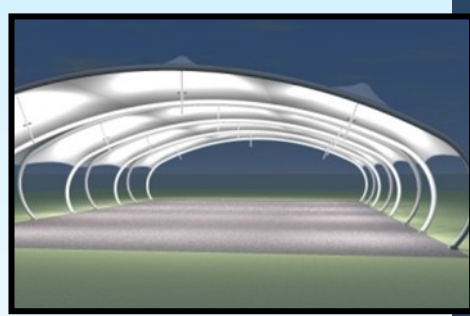

Using rigid 'Hard Top' polycarbonate roofing or flexible 'Soft Top' PVC tensioned membranes, larger and larger areas can now be covered with these superior clear span structures.

While function is the most critical aspect, these C.O.L.A.s can make an architectural statement with their arched rafters or trusses, flowing curves and shapes. The 99% UV block they provide while still allowing a high level of light transmission is also a huge advantage. Lighting setups and sound systems can be included for that added dimension of assembly points, galas, functions or even night time training if required.

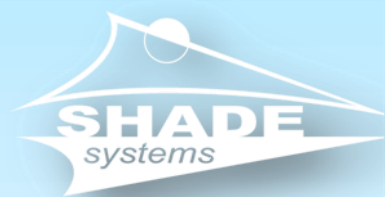

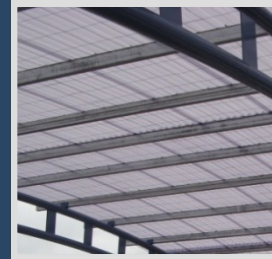

'Cover for Generations'

All young New Zealanders deserve to experience a quality physical education and a safe one. C.O.L.A's are becoming an important part of the New Zealand School and Institution scene – an important necessity because of this country's harsh environment and weather—an answer to providing all season facilities for sporting and other outdoor activities.
