

Shade Systems

Serious cover for serious playgrounds. When you require continuous shade, generous headroom, advanced durability and stylish function all in one, then HIP-ROOF SHADE STRUCTURES are the ANSWER! These are robust structures. They don't have the same tendency as sails to sag or flap and are much more resistant to climbing or vandalism.

Shade cloth is a breathable material that provides the ultimate heat reduction on anything beneath. The HIP-ROOF has a simple, clean form that is compatible with a variety of architectural approaches and effectively covers large areas from the U.V.'s without that closed in feeling.

'Cover for Generations'

These structures have a shade cloth membrane, tensioned over a hip shaped framework supported by freestanding poles. This is held taut with a tensioned stainless-steel wire cable sewn into the perimeter hem, allowing our structures to withstand virtually any weather conditions.
