

SQUARE HYPAR SAIL

TIMBER POLES

SMART & NATURAL

If you want a Shade Sail that blends in with New Zealand's clean, green landscape, to relate to an ecological theme or you simply like a 'natural look' then we offer the perfect solution - Timber Pole Shade Sails. These simple modular Hypar Shade Sails are a very effective option as a single stand-alone shade structure or as a combination with multiple, interacting and overlapping designs. Dynamically created with function, form and flair in mind. Covered with a 5 year warranty.

WARRANTY

These structures are covered with our 5 year warranty.

ENGINEERED

We can provide Structural Engineering for any Hypar Shade Sail, this is required for Council permits and gives you the added assurance that your structure will be safe for many years to come.

FABRIC/SAIL

The shade cover is manufactured from heavy duty materials. The design is modular but each sail is individually created and custom made and fitted to each site situation.

Shade fabric provides up to 95% UVR block, it also allows plenty of light and airflow. The heavy duty HDPE mesh fabric is available in many colours. Robust webbing tape is sewn into all hems with PTFE thread for increased durability.

HARDWARE

The corner tensioning system is fully adjustable and all hardware is marine grade stainless steel (eyebolts may be galvanised depending on size of structure).

COLOURS - OPTIONAL

You also have the choice of coloured timber poles. Coloured poles have a wood stain finish giving them a custom look and extra protection against the outdoor elements.

TIMBER POLES

Our timber poles are set in concrete to give maximum stability and pre-cambered for strength and aesthetics. The timber used meets the high density requirements laid down in NZS 3605:2001 (Timber Piles and Poles for Use in Building) they are also treated to H5 levels to ensure long life.

NATURAL - STANDARD

Timber poles can be left with a natural finish.
