ExtraBlock 330 10 Year UV Warranty

10.05.21

Nurange warrants that Extrablock fabrics manufactured from HDPE will not degrade or show serious evidence of material breakdown as a result of exposure to normal Ultra Violet light for a period of 10 years from the date of purchase. Nurange will not be held responsible to replace any portion of netting which shows no evidence of snow and ice, material degradation, caused by exposure to normal Ultra Violet light. No warranty applies where the damage is a result of a mechanical abrasion, chemical erosion, damage caused by the erection process, mishandling or excessive loading beyond the tear and tensile strength of the products. The warranty does not extend beyond the resistance to UV degradation.

Exposure of HDPE to certain strong oxidising agents, such as fuming sulphuric acid, concentrated nitric acid, nitration acid, chrom-sulphuric acid, chlorosulfonic products, and where the products are used in areas exposed to chemical contamination, or any of the above, reference should be made to the technical department before erection of the products. Nurange accepts no liability to any party or property for any use of any Nurange product in a manner for which the product is not intended. Where creosote poles are used as supports, then these poles must be covered or capped to prevent direct contact with the fabric.

Nurange Extrablock products may exhibit minimum colour fading after 8 years' exposure to the sun, with the exception of red or yellow coloured products, which may exhibit colour fading after 3 years. Nurange does not guarantee colour fastness beyond the levels indicated above. Slight colour variances may occur.
